

TOSHIBA IPedge™ Call Manager Setup Process

Net Server Client Logon Settings

Client Information

The Login Name, Password, and Extension, below, apply to the Toshiba Net Server Client and are not related to your computer Login Name.

Typically, the Login Name is the name that appears on your Call Manager and the name others can see for chat sessions.

Login Name:

Password:

Extension:

Server Information

Hostname:

Use Remote Access Port [Click for Details](#)

OK Cancel

Once you have run the install file before it finishes this screen will pop up and ask you a few questions.

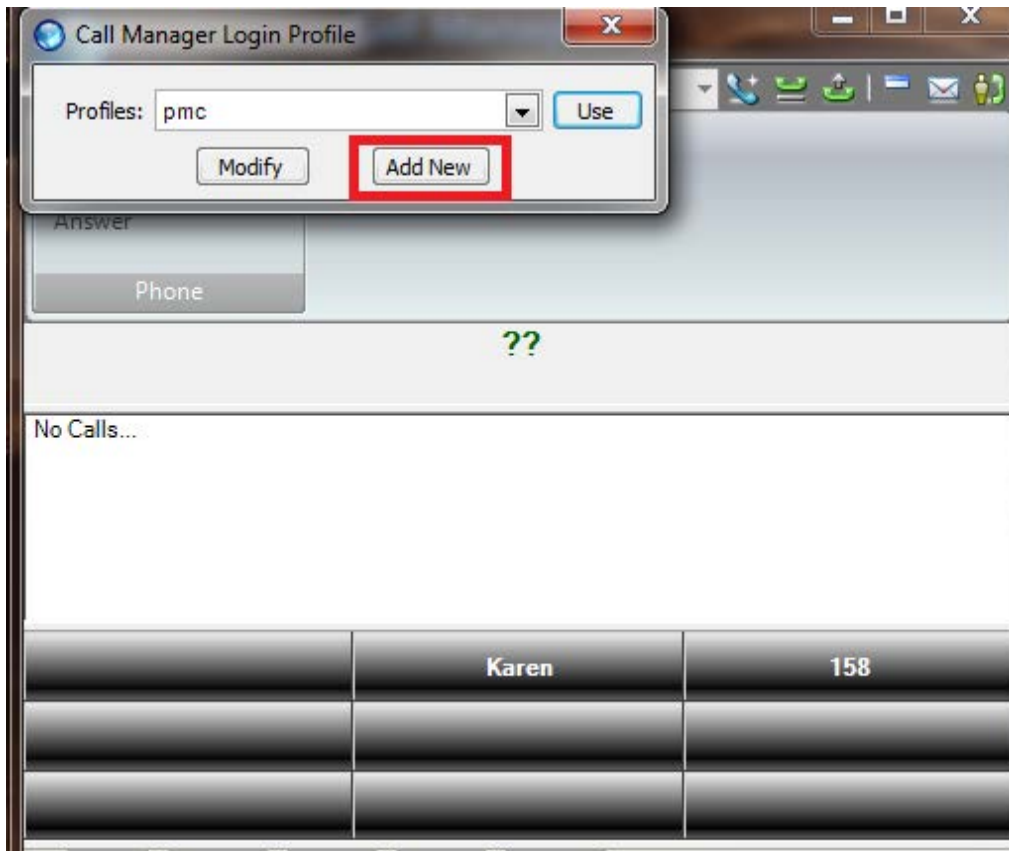

1. Your login name is the letters “u” and “c” and your extension. (ex. Your ext. is 200 your username is uc200)
2. Your password is your ext. plus the numbers 997. (ex. Your ext. is 200 your password is 200997)
3. Your extension is simply your extension number.
4. The hostname is something given to you by your network administrator and is usually in the form of an IP address. (XXX Company Hostname: 123.456.7.890)
5. Once finished typing in the information hit next and the install process will finish.

“All Your Business Communications Needs”

A new window will open up that will look like the one below. You can put anything in for the description it's just a label for the profile. The red circles next to the "Edit primary" button should turn green after a few seconds automatically (it's pretty quick you might not even see it happen).

After you have typed a description and the red circle is green, hit save and when it brings you back to the screen shown below, click "USE". After a few seconds you'll be logged in.
